DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Thome et al. (US Patent No. 5,100,636).

Thome et al. discloses a method of making ZSM-5 (a pentasil zeolite) by forming a slurry containing crystallization nuclei (i.e., seeds) and sources of silicon and aluminum. See col's 5-8, Examples 2-4, 7, and 8. The reaction mixture is crystallized to form ZSM-5 and an amorphous material (i.e., at least one other compound). Id. The product is removed from the reaction mixture by filtration to form a filter cake. See Id. The formation of a filter cake anticipates step b) of claim 1.

The recitations of claims 3 and 7-9 can be found in Examples 2-4, 7 and 8.

Allowable Subject Matter

Claims 2, 4-6, 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art fails to disclose or suggest a method of making a pentasil zeolite and another compound, and subsequently shaping the pentasil zeolite and other compound, in which

Art Unit: 1755

(1) the other compound is one of the compounds recited in claims 2, 10 or 11; (2) a doped seed is included in the reaction mixture (instant claim 4); or (3) a magnesium source is included in the reaction mixture (instant claims 5 and 6)

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
